Mountain Brook City Board of Zoning Adjustment Request

We are planning a renovation of our existing home to add a front porch and remodel our kitchen, 3 bathrooms, and adjust the rear roofline. Our goals in the renovation are to improve the existing roofline to alleviate water runoff and leakage issues that result from previous additions, increase curb appeal while maintaining the 'feel' of an original Crestline houses, and to update the kitchen and baths.

Part of the planned renovation involves the addition of a front porch to alleviate water run off brought on by the roofline of an addition built in the early 1980's by a previous owner. This addition will require a variance approval by the Mountain Brook Board of Zoning Adjustment.
