

UTILITY WORK ADVISORY

Spire upgrading pipelines in and around Mountain Brook

As part of Spire's efforts to provide the safest, most reliable energy available, we will continue our pipeline upgrade project in and around Mountain Brook. We are working closely with the City and on Monday, October 5, we'll begin work along Cross Creek Dr.

A second phase of this project is expected to start on October 19, at the intersection of Kennesaw Dr. and Fair Oaks Dr. and continue along Gaines Mill Rd., Pine Mountain Rd., Fredericksburg Dr., Corinth Dr., Chickamauga Rd. and Gaines Mill Circle.

Prior to the work beginning, literature with information about the upgrade project will be distributed to residents living in the immediate work area.

While this project requires crews to dig in the streets and, in some cases, yards, we are focused on ensuring we perform our work safely and efficiently. By working between the hours of 8:30 a.m. and 4:30 p.m. on weekdays and practicing control measures to ensure traffic flows as smoothly as possible, we plan to avoid contributing to rush-hour delays. Still, we encourage motorists to drive with caution through these work areas.

While we expect this upgrade project to take several months, we will make every attempt to reduce inconvenience to you and the community. When the project wraps up, we will completely restore affected streets, yards and landscaping. We will also send out a completion post card to ensure customer satisfaction.

If you have any questions about Spire's upgrade project, please contact Stacy Doss 205-715-3953 or Stacy.Doss@SpireEnergy.com.
